Smart Health LA Staff

Smart Health LA

Smart Health LA is an adult disease prevention and treatment program provided by Valley Community Healthcare.

Located in North Hollywood, the medical center has offered HIV testing and counseling for over 28 years, and is recognized as a safe, confidential and trustworthy resource to the LGBTQ community and residents of the San Fernando Valley.

Our compassionate team of professionals is comprised of a Medical Care Manager with a specialty in Sexually Transmitted and Infectious Diseases, a Patient Care Manager with a degree in Human Services, and a Case Worker qualified in Care Coordination and Management.

Our Services

- HIV and STD testing and treatment
- HEPatitis C testing and treatment
- PrEP navigation services
- Mental health counseling
- Primary care, dental and optometry
(for enrolled Valley Community Healthcare patients)

Our Goal

Our goal is to manage and improve the overall health outcomes of sexually active adults in the LGBTQ and surrounding communities. We take a whole person approach to patient care, and provide physical, sexual, and mental health diagnosis, treatment, and management.

Our Approach

We take a whole person approach that aims to improve the overall health and wellness outcomes of our patients by providing mental, physical and sexual health support and guidance.

To accomplish this, we:

- create and monitor linkage to and retention in medical care
- identify and remove barriers to treatment adherence
- standardize assessment and referral
- streamline care coordination
- eliminate service duplication
- reduce STIs and HIV transmission

Elvina Torres-Campos, MD, HIV Specialist
